

Custom Injection

Example custom-injection can be browsed at <https://github.com/apache/tomee/tree/master/examples/custom-injection>

Help us document this example! Click the blue pencil icon in the upper right to edit this page.

Pickup

```
package org.superbiz.entrtries;

//START SNIPPET: code

import java.beans.PropertyEditorManager;

public enum Pickup {

    HUMBUCKER,
    SINGLE_COIL;

    // Here's the little magic where we register the PickupEditor
    // which knows how to create this object from a string.
    // You can add any of your own Property Editors in the same way.
    static {
        PropertyEditorManager.registerEditor(Pickup.class, PickupEditor.class);
    }
}
```

PickupEditor

```

package org.superbiz.enventries;

/**
 * With a java.beans.PropertyEditor, you can go way beyond the built-in
 * types that OpenEJB supports and can extend dependency injection to
 * just about anywhere.
 * <p/>
 * In the world of electric guitars, two types of pickups are used: humbucking, and
 * single-coil.
 * Guitarists often refer to their guitars as HSS, meaning a guitar with 1 humbucker
 * and
 * 2 single coil pickups, and so on. This little PropertyEditor supports that
 * shorthand notation.
 *
 * @version $Revision$ $Date$
 */
//START SNIPPET: code
public class PickupEditor extends java.beans.PropertyEditorSupport {

    public void setAsText(String text) throws IllegalArgumentException {
        text = text.trim();

        if (text.equalsIgnoreCase("H")) setValue(Pickup.HUMBUCKER);
        else if (text.equalsIgnoreCase("S")) setValue(Pickup.SINGLE_COIL);
        else throw new IllegalStateException("H and S are the only supported Pickup
aliases");
    }
}

```

Stratocaster

```

package org.superbiz.enventries;

import javax.annotation.Resource;
import javax.ejb.Stateless;
import java.io.File;
import java.util.Date;
import java.util.List;
import java.util.Map;

/**
 * In addition to the standard env-entry types (String, Integer, Long, Short, Byte,
 * Boolean, Double, Float, Character)
 * OpenEJB supports many other types.
 */
//START SNIPPET: code
@Stateless
public class Stratocaster {

```

```

@Resource(name = "pickups")
private List<Pickup> pickups;

@Resource(name = "style")
private Style style;

@Resource(name = "dateCreated")
private Date dateCreated;

@Resource(name = "guitarStringGuages")
private Map<String, Float> guitarStringGuages;

@Resource(name = "certificateOfAuthenticity")
private File certificateOfAuthenticity;

public Date getDateCreated() {
    return dateCreated;
}

/**
 * Gets the guage of the electric guitar strings
 * used in this guitar.
 *
 * @param string
 * @return
 */
